

# INTERCALL RESERVATIONLESS-PLUS WITH DOLBY VOICE

IT'S TIME FOR A BETTER CONFERENCE CALL

Authorized West Partner

Conference calls are a major part of the business day. No matter if you are in the office or on the go, most of your day is spent on the phone. Ever wonder why you feel a little drained after a couple of calls?

InterCall® Reservationless-Plus® with Dolby Voice® delivers exceptional voice clarity and detail while suppressing distracting noise. As a result, all meeting participants—in the room and remotely—will more easily hear and understand one another.

## HEAR EVERY DIMENSION OF YOUR CALL—EVERYTIME

Even in challenging environments like airports, on the street, or in traffic; attendees using Reservationless-Plus with Dolby Voice will clearly hear and follow the in-meeting room conversation, so they can feel—and contribute—as if they were there in the room.

### STUNNINGLY CLEAR AUDIO

- End-to-end HD audio helps words come through clearly while carrying lifelike richness and nuance.
- Noise reduction makes your meetings distraction-free by suppressing unwanted ambient sounds such as background voices or street noise. No one will ever know you are in the middle of a noisy airport when using Dolby Voice.

### NATURAL CONVERSATION

- No more asking speakers to repeat themselves after a round of cross-talk. Spatial voice separation makes it easier to identify who is speaking and to follow the conversation as it moves among speakers by presenting each person's voice from a distinct virtual location.
- Support of a natural cadence allows all voices to be heard—not just the loudest, and enables participants to speak (and hear) at the same time by minimizing sound delay.

### INCREASED PRODUCTIVITY

- The more you can hear, the greater the exchange of ideas and information. Enhanced speaking and listening experience encourages better participation and discussions.
- Clear and naturally flowing conversations increase comprehension, so meetings are more efficient and productive.

To learn more or to enable Dolby Voice on your Reservationless-Plus account please contact your sales representative.

## Key Features of Reservationless-Plus

- **Consistency:** Receive permanent dial-in numbers and conference code for all calls up to 150 participants.
- **Convenience:** No reservations, operators or time limits.
- **Ease-of-Use:** Control your conference commands from your telephone keypad or online using InterCall Call Manager
- **Customization:** Tailor all of your calls or just one to match your needs.
- **Support:** Rely on our 24/7/365 global support should you require assistance.
