Streaming

InterCall delivers unrivaled software and services to make streaming media and virtual presentations easier to execute and more engaging to better connect with your target audience.

- + **Best-of-breed Service** - Developed from the ground up, InterCall Streaming Services' high-impact live and on-demand virtual presentation software is designed to teach, train and entertain your audience in the most efficient and effective way possible.
- + **Streaming Platform** - Along with factory-standard features including Q&A, polling, Flash-slide conversion,

testing and certification systems, full-screen video and simple sign-in and registration, InterCall Streaming's flexible Adobe Flash-based platform is purpose-built for customization to create the best virtual programs for your organization.

- + **Streaming Events** - From a live virtual symposium to an on-demand training program, an interactive conference to a national product launch, a live e-learning class to a hybrid meeting—whatever your event, it's right at home with InterCall Streaming Services.

On-Demand Tools

WebEx Training Center On-Demand

Record and easily edit an on-demand webinar.

Brainshark

- + Push content and rich media, like Flash, video and live web pages on-demand.
- + Use reporting tools to see how your presentation was viewed, when and by who—all in real-time.
- + Insert surveys, tests and polls.

Unified Communications (UC)

Combine conferencing, messaging and telephony, along with presence and mobility features, to provide a truly integrated communications experience. InterCall offers Unified Communications (UC) solutions from industry leaders, including Cisco WebEx, IBM, Microsoft and more. Our in-house team of consulting and systems integration experts can provide assistance at every step of the UC process.

Services include:

- + Planning
- + Deployment and project architecture
- + Flexible solution models

Our UC services help you to decrease costs by reducing travel, IT and communications expenses while maximizing individual productivity and fostering team collaboration.

Crisis Communication Solutions

Send time-sensitive information rapidly via voicemail, email, fax, pager and text.
